

Future Scenarios for Sustainable Agriculture in the EU

SoilCare webinar, 23 April 2020

How we organise the webinar

All participants are muted.

You can send questions to the organisers which we will respond to directly if possible.

Comments/questions will be recorded and taken into account when finalising scenarios. Comments can also be sent after the webinar.

We will introduce each scenario with a short movie following by a series of polls which will ask you to provide your views on the scenario presented.

Agenda

Introduction to the SoilCare project

Melanie Muro, Milieu Consulting

Presentation of four scenarios for the future of agriculture in Europe

Hedwig van Delden, RIKS

Next steps and closing of webinar

Melanie Muro, Milieu Consulting

SoilCare

for profitable and sustainable crop production in Europe

What SoilCare aims to achieve

SoilCare aims to

- to **identify** promising soil improving cropping systems (SICS) and agronomic techniques.
- to **test and assess** the potential of SICS in 16 sites in Europe
- to **facilitate adoption & implementation** of SICS in practice
- to **develop an interactive tool** for the selection of SICS throughout Europe

What is a Cropping System?

'Cropping system (CS)' = crop type, crop rotation, and the agronomic management techniques used on a field over a period of years

Check out our YouTube channel for more information:

Why we are here today

To obtain feedback on a set of draft scenarios developed based on input from a participatory scenario workshop, held in June 2019, in Brussels.

Who are today's participants?

What we are planning to do now

- Narrative scenarios will provide input to the modelling and a second workshop. [Feel free to send us written comments after the webinar!](#)
- Results will provide input in the identification of best policy approaches to promote the uptake of SICS..
- Dissemination of policy recommendations through a report, conferences and policy briefs.

Thank you for participating!
